

Lab activity 3

HTML, CSS, JS

Prepare 3 webpages based on theme COVID-19 linked with each other using <a> tag

In any of three pages you have implement the following but make sure we can jump from one to the other two:

1. At least two headings
2. At least two images (**all of them must be responsive in nature**)
3. At least two divisions (<div>)
4. Use CSS to design the following:
 - a. Page and divisions background
 - b. Font style and size
 - c. Divisions padding
 - d. Page and divisions margins
5. Explore the difference between padding and margin (no need to submit this part)
6. BONUS - Using external JS and CSS.

**** Please make sure the webpages seem meaningful.**

****BONUS** questions are not required to attempt but if you feel that it is worth attempting then please do as it serves an important component in increasing your marks if you commit mistakes in any of the previous questions.

****Please add a README.md file to include any special methods or tags you might have used, if you have not deviated from the traditional tags discussed here then you are not required to submit a readme in this assignment.**
